

Environmental Policy

Ayrshire Metals Ltd recognises that our operations have a direct effect on the environment. We are committed to managing these impacts responsibly and continually improving our environmental performance. This policy sets the direction for our environmental management system, implemented in line with the phased approach of BS 8555.

We will:

1. Prevent Pollution and Reduce Environmental Impact

Identify, assess and control the environmental aspects of our activities, products and services. We will take all reasonable measures to prevent pollution, minimise waste, reduce energy use, and protect land, air and water.

2. Comply with Legal and Other Requirements

Maintain awareness of all relevant environmental legislation, permits and stakeholder requirements, and ensure full compliance at all times.

3. Use Resources Efficiently

Work to reduce raw material waste, improve scrap recovery and recycling rates, and optimise energy and water consumption across all processes.

4. Set Objectives and Drive Improvement

Establish measurable environmental objectives and targets. Progress will be monitored, reported, and reviewed routinely to ensure continual improvement.

5. Improve Environmental Awareness and Competence

Provide appropriate training, information and supervision so employees understand their environmental responsibilities and contribute to improved performance.

6. Prepare for Emergencies

Maintain effective controls and emergency response arrangements to mitigate environmental incidents and ensure a rapid and responsible response.

7. Engage Stakeholders

Communicate this policy internally to all personnel and make it publicly available to interested parties including customers, suppliers, regulators and the local community.

8. Leadership and Accountability

Senior management will provide the necessary resources and take accountability for the environmental management system's performance and improvement.

This policy provides the framework for setting and reviewing our environmental objectives and will be reviewed annually, or sooner if significant changes occur to our operations or legal obligations.

Signed: 

Managing Director, Ayrshire Metals Ltd
