

Environmental Policy

Our Commitment: At Ayrshire Metals Limited we recognise our responsibility to protect the environment for current and future generations. We are committed to integrating environmental considerations into all aspects of our operations and decision-making processes and ultimately reduce our carbon footprint to the lowest possible level. Our environmental policy outlines our commitment to sustainable practices, pollution prevention, and continual improvement in environmental performance.

Key Focus Areas:

- **Recycling and Waste Reduction:**
 - We employ robust systems to minimise waste and track scrap materials.
 - We responsibly recycle residual scrap, IT Equipment, paper and cardboard through approved contractors.
 - We encourage the reuse of transport materials among our customers and suppliers.
- **Resource Optimisation:**
 - Our focus is on reducing energy consumption by streamlining processes and using resources efficiently.
 - We adopt energy-saving technologies to align with our objectives.
- **Sustainable Procurement:**
 - We will consider environmental criteria in our procurement decisions, favouring suppliers with sustainable practices and products with minimal environmental impact.
- **Local Environmental Impact:**
 - We conduct our operations in harmony with the local community, minimising pollution and disturbance to wildlife.
 - We will minimise emissions to air, discharges to water, and generation of waste through the adoption of innovative solutions and best practices.
- **Legal Compliance and Employee Awareness:**
 - We ensure that all employees understand and comply with legal and regulatory requirements.
 - We provide ongoing training and allocate resources to meet these obligations and to raise awareness of environmental issues and promote sustainable practices.
 - We will strive to exceed these standards whenever possible to minimise our environmental impact and contribute positively to the communities in which we operate.

By concentrating on these five areas, we aim for continual improvement across our business processes, striving for excellence in environmental practices. We aim to minimise our environmental footprint, protect natural resources, and contribute to a healthier and more sustainable future for all.
