

SwageBeam™ - The Multi-Purpose Beam

Many of our customers have adopted **SwageBeam** to meet their own requirements and those of their customers. Applications are as diverse as the product itself.

Mezzanine Floors

Various options are available to those wishing to build storage platforms and mezzanine floors. **SwageBeam** floor beams can be used throughout as in the case of our Slimline '220' and Slimline '300' systems or alternatively with heavy hot rolled main beams. A comprehensive range of accessories completes the package.

A Mezzanine Floor

SwageBeam Portal Framed Building System:

Our system is a fast and economic method of creating single and multiple span buildings. **SwageBeam** is used throughout in conjunction with specially designed eaves and ridge brackets to create a lightweight high performance structure. A total package from design through to completion is available.

Prefabricated Modular Buildings

SwageBeam can be found in many of today's lightweight modular buildings. We have worked closely with prefabricated building companies to develop robust and cost effective designs for both cabins and modules. With such a diverse range of sizes available, we have beams to suit most requirements.

SwageBeam™ Building
